

1. Are you aware of the former environmental issues at the Site and the cleanup activities that have taken place to date?

Redacted for privacy : I have reviewed the EPA website and few the documents that are available. I was unable to review a history, current community involvement, and EPA approved responses to understand former or current environmental issues at the site.

2. What is your overall impression of the project, including cleanup, maintenance and reuse activities (as appropriate)?

Redacted for privacy : EPA has not provided adequate information for the public to determine the current status of the site. Community involvement is lacking. EPA states there is no interest? If the site has had no community interest EPA has not been effective in communicating the outstanding issues.

3. What have been the effects of this Site on the surrounding community, if any?

Redacted for privacy comment: No information has been provided by EPA to determine the effects of the site and surrounding community.

4. Have there been any problems with unusual or unexpected activities at the Site, such as emergency response, vandalism or trespassing?

Redacted for privacy comment: No information has been provided by EPA.

5. Has EPA kept involved parties and surrounding neighbors informed of activities at the Site? How can EPA best provide site-related information in the future?

Redacted for privacy comment: No information has been provided by the EPA to validate EPA's oversight.

6. Do you own a private well in addition to or instead of accessing city/municipal water supplies? If so, for what purpose(s) is your private well used?

Redacted for privacy comment: NO.

7. Do you have any comments, suggestions or recommendations regarding any aspects of the project?

Redacted for privacy comments:

1. EPA has not provided the public with adequate community involvement tools or provided public meetings.
2. A local citizens group has requested a meeting with the Regional Administrator and follow-up answers to their questions and EPA has not provided this opportunity or specifically answered their questions.
3. The EPA LEAD did not return my phone calls to follow-up on questions re the citizens group.

4. The local citizen group CLLEAN received TAG grants and the information is not posted to the EPA website.

5. CDPHE submitted written concerns to EPA in 2015. There has been no EPA response posted. In the recent 2016 Superfund report to the Colorado legislature the CDPHE concerns have not been addressed. EPA has not responded to CDPHE and the issues have not been posted for public review?

6. EPA should “promote” a Citizen’s Advisory Group. EPA should have public meetings. The prior CIP reports do not address citizen concerns.

7. The local citizen group CLLEAN requested EPA test offsite contamination. EPA has not responded. Why?

8. A Lowry Landfill steering committee was formed and the local citizens’ group was not invited to participate? Why?

9. Why is there no update regarding the 1,4 dioxane north of the Lowry Landfill site?
